Faculty:

Examination Instructions

1. Examinees will be provided with an examination booklet containing questions.
2. Questions are on both the front and back of the page.
3. A separate answer sheet will be distributed for multiple-choice questions.
4. Answer ALL questions to the best of your ability.
5. The examination booklet will be collected at the end of the exam.

SECTION	GRADE
READING	/20
STRUCTURE/GRAMMAR	/30
VOCABULARY	/30
WRITING	/20
TOTAL	/100

English Language Proficiency

Read the instructions for each part carefully.
You are required to answer ALL questions.

Section 1: Reading

A. Choose the correct word that fits in the blanks below:

There is increasing evidence that health is linked to personality. However, until now, the relationship has not affected the way health care is delivered. There are several reasons for this. Some health workers doubt whether there is a direct link between 1. _____ and personality or whether it's just a/an 2. _____. Some feel it is their professional duty to treat all patients in the same way. Others 3. _____ that delivering health services according to patients' 4. _____ will have minimal impact and therefore isn't worth the effort. However, some psychologists believe that applying different procedures to people with different personalities could have a significant, 5. _____ effect on health.

1. a. fitness
b. health
c. weight
d. slimness
2. a. accident
b. fib
c. story
d. coincidence
3. **a. argue**
b. fight
c. hold
d. press
4. a. behaviours
b. well-being
c. personalities
d. attitudes
5. a. negative
b. positive
c. equal
d. different

B. Read the passage carefully and fill the gaps with the sentences below:

Deepfakes are videos, images, or audio that have been changed using artificial intelligence (AI) to make something look real, even though it's not. 6 c. Deepfakes can swap faces, change voices, and create fake content that looks real. While this technology can be fun in movies or art, it can also be dangerous when used to spread false information. They use AI technology called generative adversarial networks (GANs). GANs involve two systems: one creates fake content, and the other tries to detect if it's real or not. 7 g. By using a lot of video, photos, and audio of someone, AI can make deepfake videos that are very convincing, making people look and sound like someone they aren't.

Deepfakes are becoming increasingly easier to make. 8 e. Now, almost anyone with a computer and some basic software can create one. This makes it easier for people to spread fake content, which can be harmful. The more people are aware of the existence of deepfakes, the less likely they are to believe everything they see.

They can cause big problems in politics. People can create fake videos of politicians saying things they never said, or doing things they never did. 9 b. These fake videos can quickly spread online, confusing people and damaging the politician's reputation. Fake videos might be shared during election campaigns, and voters might not have enough time to check if they are real or not. As these videos spread on social media, millions of people might see them before the truth comes out, which can hurt political discussions and make it difficult to know what's true.

Deepfakes don't just affect politicians—they can harm anyone. People can make fake videos or audio to spread lies about someone's personal life, making it look like they said or did something wrong. These fake videos can be shared online, ruining someone's reputation, relationships, or career. For example, some people use deepfakes to create fake inappropriate videos of celebrities or private individuals without their consent. 10 a. Once a deepfake is online, it's very hard to remove it completely, so the harm can be permanent.

- a. This can cause a lot of emotional pain and long-term damage to the victims.
- b. For example, a deepfake might show a party leader lying, insulting others, or supporting a policy they don't actually support.
- c. With AI tools, people can make someone appear to say or do something they never actually did.
- d. Some websites are using AI to detect and take down deepfakes before they spread.
- e. In the past, creating a deepfake required special skills and expensive tools.
- f. Anyone should find it easy to identify deepfakes due to their poor quality.
- g. The first system improves its work until it can make the second system believe the fake content is real.

Section 2: Grammar and Structure

11. Ask him to go to the post office _____ some stamps.
a. to get
b. for getting
c. in order he gets
d. that he gets
12. He may be able to come to the party. _____ the other hand, he may be too busy.
a. On
b. In
c. By
d. For

39. initiate a	d. Families must _____ with financial pressures.
40. demolish c	e. Lack of regular communication is named time and time again as the major _____ between management and employees.

Section 4: Writing

Write a short paragraph stating your point of view on the following topic.

It is sometimes thought that people who travel outside of their own country are more tolerant and understanding of others. To what extent do you agree?

Possible Answer:

International travel is widely recognized as a powerful catalyst for fostering tolerance and understanding of others, and I completely agree with this view. Firstly, direct immersion in diverse cultures, customs, and perspectives challenges ethnocentric attitudes, thereby broadening one's worldview in a variety of ways. For example, experiencing daily routines within a host family and navigating unfamiliar social traditions compels travelers to acknowledge and respect customs beyond their own. Moreover, such exposure significantly develops global problem-solving skills, as travelers adapt to new social norms, communication styles, and everyday challenges. For instance, using public transportation in a foreign language, negotiating cultural differences in the workplace, or resolving misunderstandings in social interactions encourages flexibility, patience, and creative thinking. Together, these experiences collectively foster understanding, open-mindedness, and heightened cultural awareness. In conclusion, travel abroad plays a crucial role in enhancing tolerance and understanding, and I firmly believe it is an effective means of shaping more accepting and globally minded individuals.

Best of luck.
